## INTERIORS

### CAVELL PARK CARE HOME

-

The latest in a long line of collaborations with Porthaven Care Homes, we embarked on a unique project that didn't come with a standard brief. Instead, the singular request from Porthaven was to make the next one even better, a challenge we were excited to embrace.

## THE BRIEF

This task served a dual purpose: not only to enhance the living environment for those that reside there but also to progressively build and elevate the brand image of Porthaven. Our aim was to design an interior that would set this care home apart, reinforcing Porthaven's reputation as a provider of exceptional, high-quality care environments.

## THE SOLUTION

This purpose-built care home has 69 rooms catering for 24-hour residential, nursing, and dementia care. Designed specifically to provide an environment for the practical delivery of high-quality care, it is also stylish and comfortable incorporating many thoughtful features tailored towards the satisfaction and safety of individuals.

Everyone at Cavell Park Care Home benefits from a generously sized bedroom with an ensuite wet room, as well as numerous communal living areas for socialising with friends and family, engaging in their hobbies, and dining.

Individuals also have access to a state-of-the-art gym, cinema, café, and a hair and nail salon. A dedicated leisure and wellness room, and a private dining room for special family celebrations completes the array of first-class facilities on offer.

## HIGHLIGHTS

A unique and homely interior was created with the aid of many standout pieces.

The main lounge was designed with great care to create intimate areas; the Reading Lounge, TV Lounge and Sun Lounge, all coherently designed featuring furniture and furnishings with coordinating accessories.

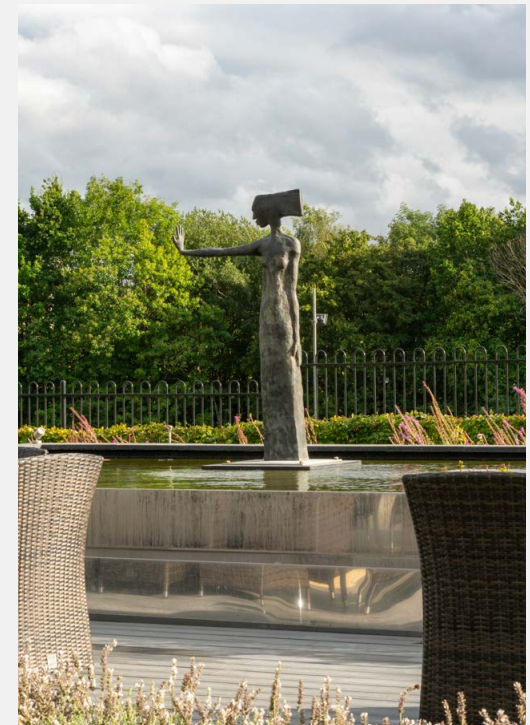

The sun room is primarily characterised by large, expansive floor to ceiling windows draped with voile allowing the full effect of the sunlight without the glare. Providing an uninterrupted view of the outdoors, such an architectural design not only lets individuals feel the sun's warmth but also ensures that they are bathed in natural light, which can boost mood and improve circadian rhythms.

Introducing a diverse range of activities and spaces, such as games rooms, a bars or bistro, can significantly enhance quality of life. By creating opportunities for those that live there to engage, socialise, and even challenge themselves, these spaces promote personal growth, camaraderie, and a renewed zest for life

## THE RESULT

Attention to detail in care home interior design goes beyond creating an attractive space; it's about understanding and catering to the unique needs and challenges faced. Every piece of artwork, every ornament and design feature is a nod to life experiences, preferences, and aspirations. By incorporating these thoughtful design elements, Cavell Park transcends mere functionality to offer a dignified, engaging, and enriching environment, truly making it their home.
