

# CARE HOME

INTERIORS CO.

## ELIZABETH GARDENS CARE HOME

Elizabeth Gardens Care Home redefines what it means to live well in later life. Purpose-built with a clear emphasis on luxury, functionality, and personal fulfilment, it offers a unique and elevated care experience.

This is a care home where interior design, clinical excellence, and compassionate care meet in perfect harmony. A sanctuary of style, comfort, and connection that richly deserves its place among the UK's most prestigious care homes.

## THE BRIEF

The design brief was to create an uplifting, experience-rich environment that celebrates comfort, choice and individuality moving beyond traditional care environments, without losing the warmth and familiarity of home.

## THE SOLUTION

Elizabeth Gardens offers aspirational yet accessible spaces that feel special, encourage social connection and support meaningful engagement. The design vision centred on comfort, contemporary style and joyful everyday experiences without losing the warmth, familiarity and human touch of home, with just a few choice wow moments. Innovative design features intended to delight, spark discovery and make residents feel special.

The carefully curated Nook, architectural walk-throughs, lounge zoning and bespoke furniture installations provide unique experiences not found in typical care settings.

## HIGHLIGHTS

Every space has been shaped to allow personal preference to thrive, offering residents genuine choice in how they spend their day. Zoned living areas flow naturally from one to the next.

Residents can pause for moments of quiet contemplation, enjoy conversation in more sociable areas, or gravitate towards informal "hangout" spots that feel relaxed and familiar. This subtle zoning achieves a sense of structure without rigidity and supports independence while offering the reassurance to move freely and feel truly at home in every corner.

Tucked within a larger lounge, "The Nook" offers an intimate refuge inspired by the charm of a cocktail lounge, cocooning, safe and irresistibly inviting. Bespoke seating hugs the perimeter, including purpose-made corner units with inset feature mirrors that add depth and cohesion. The colour story runs through picture rails, ceiling accents and wallpaper, uniting the space with calm sophistication.

Fringed wall lamps, floor uplighters and ambient lighting create soft pockets of illumination perfect for reading, listening to a podcast or enjoying a private conversation. It offers residents the joy of discovery and the comfort of retreat; a truly unique installation in a care setting.

## HIGHLIGHTS

The private dining room is a masterclass in subtle grandeur. Bespoke furniture, bronze accents, architectural mouldings and ceiling cornice work combine to create the atmosphere of a restaurant from another era. Feature lighting casts a warm glow while table dressing signals celebration, ceremony and pride. This space evokes a real sense of occasion akin to that of visiting a restaurant.

The garden terraces extend the experience of home beyond its walls creating an effortless connection between indoor comfort and the restorative calm of nature. Designed as natural extensions of the living spaces, each terrace offers an inviting opportunity to step outside and engage with the rhythms of the seasons. Each terrace offers both solace and stimulation in equal measure embodying the home's philosophy to promote wellbeing, independence and joy through connection to nature comfort and beauty

## THE RESULT

This interior scheme demonstrates how thoughtful aesthetics, sensory awareness and subtle innovation can transform dementia care environments. Every detail has been designed to reassure, empower and delight; creating a home that supports identity, ability and wellbeing without ever compromising dignity, warmth or comfort.

The result is a home that feels extraordinary without ever losing sight of comfort.
